BEFORE

PREPARATION

1.

PREPARE the hair with INVIGO Aqua Pure Shampoo. Towel-dry.

2.

WIND HAIR onto rods.

3.

APPLY CREATINE⁺ Curl Lotion, then leave to develop. Determine the final development time by taking test curls at different areas of the head. Open a rod gently to see if the hair is curled.

4.

WHEN the curls seem sufficient rinse well with rods on (rinse for 3 minutes).

APPLICATION

| CREATINE⁺ CURL / WAVE VARIANT	WITH HEAT	WITHOUT HEAT
(C) FOR COLORED OR SENSITIZED HAIR	8 – 12 min	10 – 20 min
(N) FOR NORMAL TO RESISTANT HAIR	10 – 15 min	15 – 20 min

NEUTRALIZING

BEFORE NEUTRALIZING In case of service with WELLAPLEX, apply N°1 Bond Maker after rinsing off the curl lotion. Mix WELLAPLEX N°1 Bond Maker with water (1:6). Apply on rods and develop for 5 minutes. Rinse.

5.

NEUTRALIZING: After rinsing gently, remove the excess water by tapping with a towel. Measure 100 ml of neutralizer (ready-to- use) in a bowl. Apply 2/3 of the neutralizer on rods with a sponge and leave in for 5 minutes. (You may also use an application bottle).

NEUTRALIZING

6.

REMOVE the rods. Apply the remaining 1/3 neutralizer mixture onto the hair and leave to develop for 5 more minutes and rinse.

7.

FINISH WITH Perm Post Treatment.

ALTERNATIVE STEP 7
In case of service with WELLAPLEX, use N°2 Bond Stabilizer instead of post perm treatment. Apply on damp hair, develop for 10 minutes and rinse well.
